

CCI Conveyor Pulleys

CCI has teamed up with the industry's top manufacturers of bearings and power transmission equipment to provide complete assemblies of pulleys, lagging, shafting and bearings.

We manufacture our own take-up frames and can package them with the pulley assembly as well.

CCI can assemble a complete drive package including the motor, V-drive, reducer and pulley assembly.

Let CCI design your drive package and leave the headaches to us.

At CCI, exceeding industry standards is our specialty.

PULLEY • HUBS • LAGGING • SHAFTING • BEARINGS • TU FRAMES • DRIVES

CCI Pulley Assemblies bring together the best names in the business to offer a turnkey solution.

Pulleys: 3-1/2" to 60", Drums and Wings
