## Conveyor Pulleys

CCI Conveyor Pulleys will help you select, design and specify all components within your conveyor system. Our engineers are ready to assist you in your efforts to select the proper conveying troughing idlers, conveyor belt, motor/speed reducer, bearings and take up frames, as well as the pulleys and proper lagging.

We have formed a strong partnership with most of the major power transmission equipment and bearing manufacturers and are poised to supply any component that is standardized in your industrial location.

Please feel free to call us for package design assistance relating to:

- Pulleys
- Lagging
- Gear Drives
- Shafting
- Bearings
- Backstops
- Troughing Idlers
- Conveyor Belt
- Frame Structure
